The Science of Learning Well... Together

Student Tip #3

IMPORTANT POINT!

Feedback is important to help us to know what we are working towards, how we are going, what we need to work on, and where we are heading to next with our learning or performance. But for feedback to be useful, we need to receive it, and then do something with it. When we practice giving and receiving feedback to and from our peers, it can benefit both their learning and understanding, and our own.

WHAT DO YOU THINK?

ON YOUR OWN...

If you do a practical subject like Music, Dance, Drama, PE, or a language, film your self performing or speaking.

Send your video to your group or a friend.

Direct them to what you would like feedback on, maybe using the Criteria Sheet.

ON YOUR OWN...

How will you action the feedback received?

How will you know you have addressed it and improved your performance?

WITH YOUR GROUP...

Collate the groups videos and view them like a concert!

View together and provide feedback to one another using the criteria.

Discuss strengths and areas for improvement.

Set goals for actioning feedback. Share with group.
